

# RUM RIVER 1W1P MEMORANDUM

**Date:** March 2, 2020

**To:** Rum River 1W1P Technical Committee

**From:** Julie Blackburn, RESPEC (julie.blackburn@respec.com or 651.605.5705)

**RE:** Groundwater/Drinking Water Goals, Measures, and Targeted Resources

---

This memorandum provides a few extra details regarding the summary sheets for the three groundwater and drinking water issue statements.

- Based on the feedback from the February TAC, workgroups were created for each of the Resource Categories (Surface Water, Groundwater/Drinking Water, and Natural Resources).
- The Groundwater/Drinking Water Work Group met and developed additional details for each of the three goal statements and their associated goals.
- Now there are only 4 goals associated with Issue Statement 1 because Goal 1: Increase decision maker, technical staff, and citizen knowledge of where drinking water contaminants exist ***was merged with*** Issue Statement 3, goal 1: Increase decision-makers and technical staff knowledge of vulnerabilities of groundwater-surface water interaction (define spectrum of vulnerabilities).
- There is a 4<sup>th</sup> file that contains maps and data that may be useful when considering the issues, priorities, and targeting.
